Tuesday, June 17 & Wednesday, June 18, 2025**

Australia's pre-eminent telecommunications industry conference CommsDay Summit returns to Sydney this June for its 24th edition.

CommsDay Summit is the forum for Australia's top telecoms leaders: CEOs of our major telecom network operators and retailers, senior leaders from the world's top telecom technology providers and the heads of Australia's telecom regulatory agencies and major co-regulatory stakeholders.

Summit MC and
ABC host
Steve Cannane

The Summit attracts around 400 delegates: a who's who of all the people you need to meet and talk with in Australian telecommunications, but intimate enough that you can network effectively and not get lost in the crowd.

The Summit is the forum for major industry announcements and set piece speeches from Australia's telecom leaders.

The topics covered move dynamically with the industry conversation and this year will cover hot button issues such as industry sustainability, maturation of 5G and fibre, the challenge of artificial intelligence, the sector's insatiable demand for energy and much more.

If you come to one event it should be this one. Australia's top telecom conference in Australia's biggest city.
